

To whom it may concern

I would like to let the FCC know that if it chooses to replace current Fm transmitters with new LPFM it will have a negative affect on my community. Currently the KLOVE radio network operates a low powered FM transmitter on our stations. Currently this is the only station which I listen to because I know that I do not need to screen it for content that I feel would be inappropriate for my family. I also deeply appreciate the fact that they operate commercial free, which demonstrates that they care more their listeners than making a profit. This type of company is one I a million and we cannot afford to lose them. As you consider this decision I urge you to consider the positive effect KLOVE has had on me and my family. I am something that I greatly do not want to lose.

Sincerely,  
Jeffrey Ordway
